this is what our clients say . . .

"I cannot believe the large number of people walking & driving past that stop and actually make comment on our stone walls. These feature stone walls were my dream from 4 years ago and the completed works have now realised my dream to full satisfaction. Our stone walls could not be any better. Thanking you again for your fantastic product and achieving a great result in the laying of the stone to provide an everlasting feature, which has made a real focal point to our project. All the very best."

"In our fire prone country area we were looking for a product that would look good and withstand ember attack. We found it in Hoobler Stone and were even more delighted when the company was willing to colour it to our local stone. The finished job looks so natural. It is a wonderful finish to our house." **Brian & Debra Dodgson**

what is hoobler stone?

- Hoobler Stone is a light-weight, reconstituted stone veneer made in moulds cast from natural stone.
- Hundreds of different shapes are produced in a range of styles, textures and colours.
- The stone is applied piece by piece into a mortar bed to create the appearance of solid stone construction.

unlimited possibilities . . .

- Hoobler Stone is ideal for internal and external cladding applications in domestic, commercial and industrial settings.
- Any secure surface (brickwork, concrete slabs and blocks, Stone-sheet, Easylap, hebel and polystyrene building blocks) is suitable for Hoobler Stone application, with no additional supports required ie ties or special footings.

the hoobler stone advantage

- Suitable for use in bushfire prone & alpine areas.
- Classic and contemporary range to suit many architectural styles.
- Light-weight, flat-backed and easy to apply.
- Striking range of shapes, textures and colours.
- Colour-fast, weatherproof and maintenance free.
- Stone matching for individual requirements.
- More cost effective to use than natural stone.
- Obligation free measure and quote.
- Independent contractors can be recommended for stone application or DIY instructions provided.
- Proudly Australian made and owned since the early 1970s.
